OnlyOne

Italian artist, **ALEX TURCO**, has been living and working in the US for 12 years.

He founded his own company in 2009 in Miami.

He creates artistic panels on request and collaborates with the most crucial interior designers in the country.

His creations are an alternative to classic tiles, a new product which uses is to decorate the walls of private homes, restaurants, fashion retails and hotels.

Having consolidated the market to date with this innovative product, Alex wants to gamble on a new, more ambitious, and particular project.

He is creating a collection of unique pieces of art and design. This project will be called '**Alex Turco Only One**' as each piece he makes will be unforgettably unique!

It will be a collection of sculptures, paintings, and furnishing objects inspired by nature using unique and natural decorative elements with advanced techniques that he has experimented with in his years of activity.

Everything he works on is handcrafted, using the epoxy resin that has always distinguished his art form.

The technique Alex uses is the same of his Art Panels, but it is applied only once, which is why each and every piece of art is a unique piece ... there is **ONLY ONE** in the world!

Welcome to his preview!

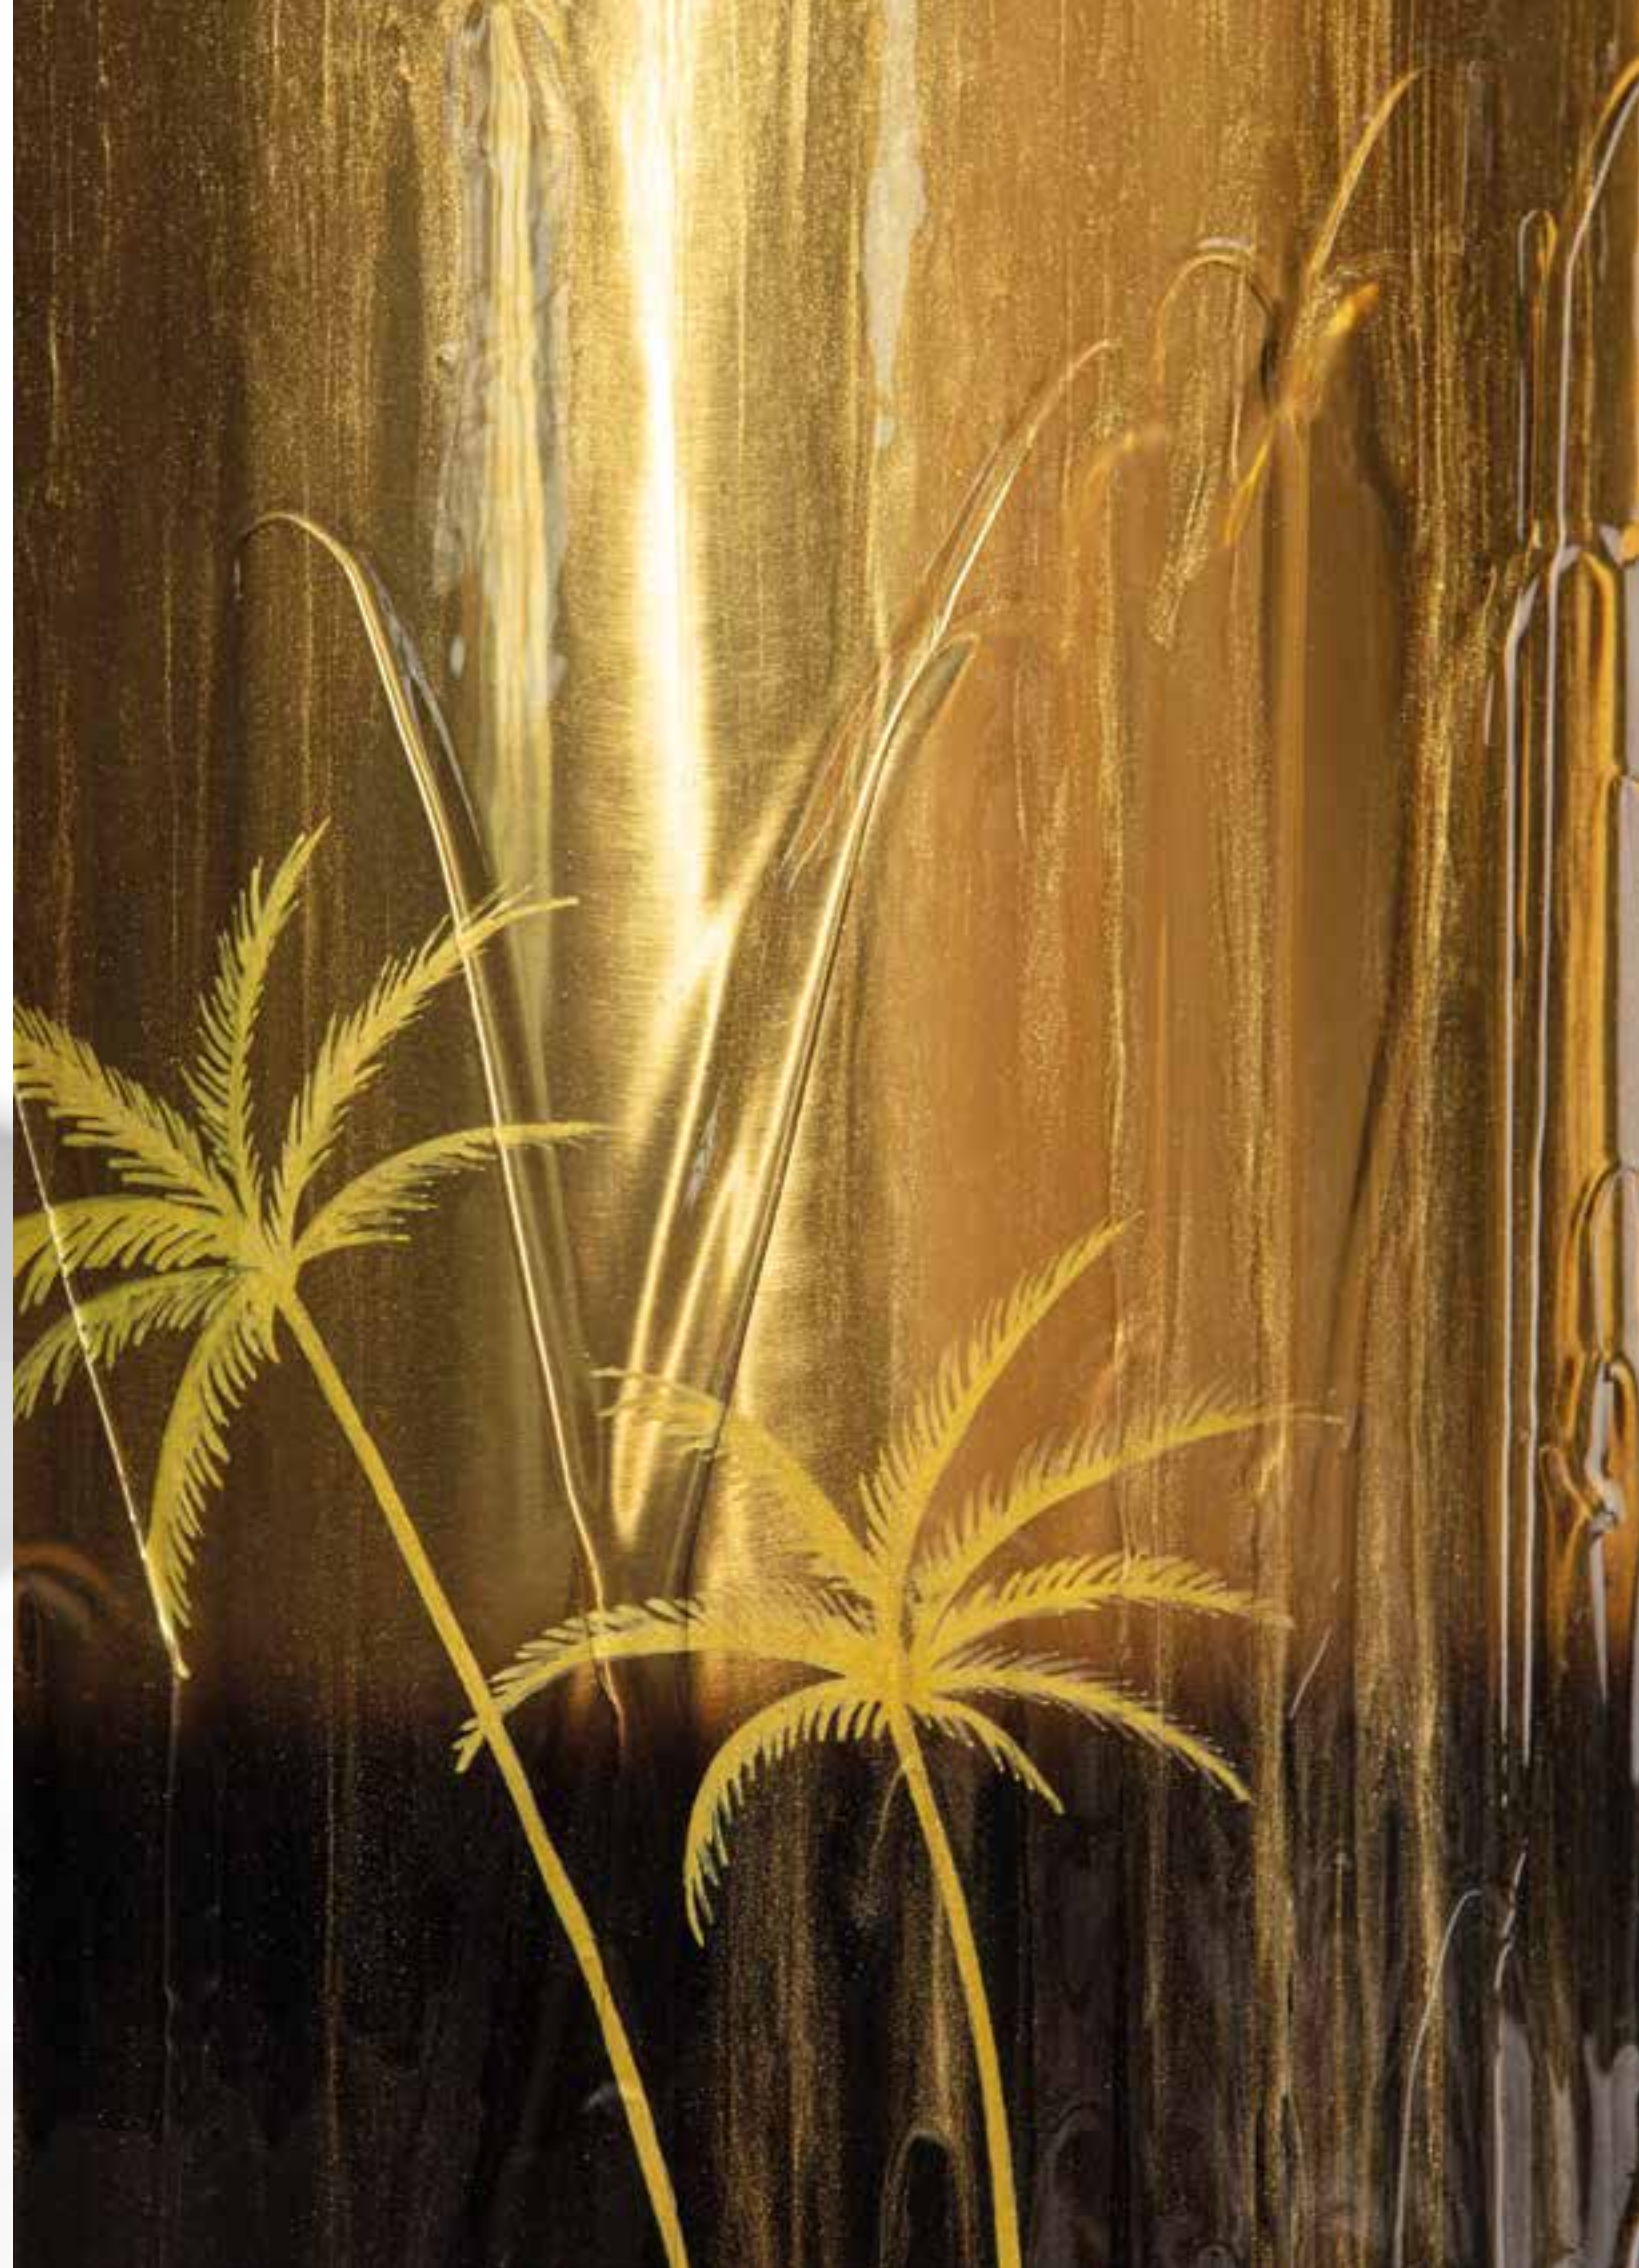

Alex Turco **The Artist**

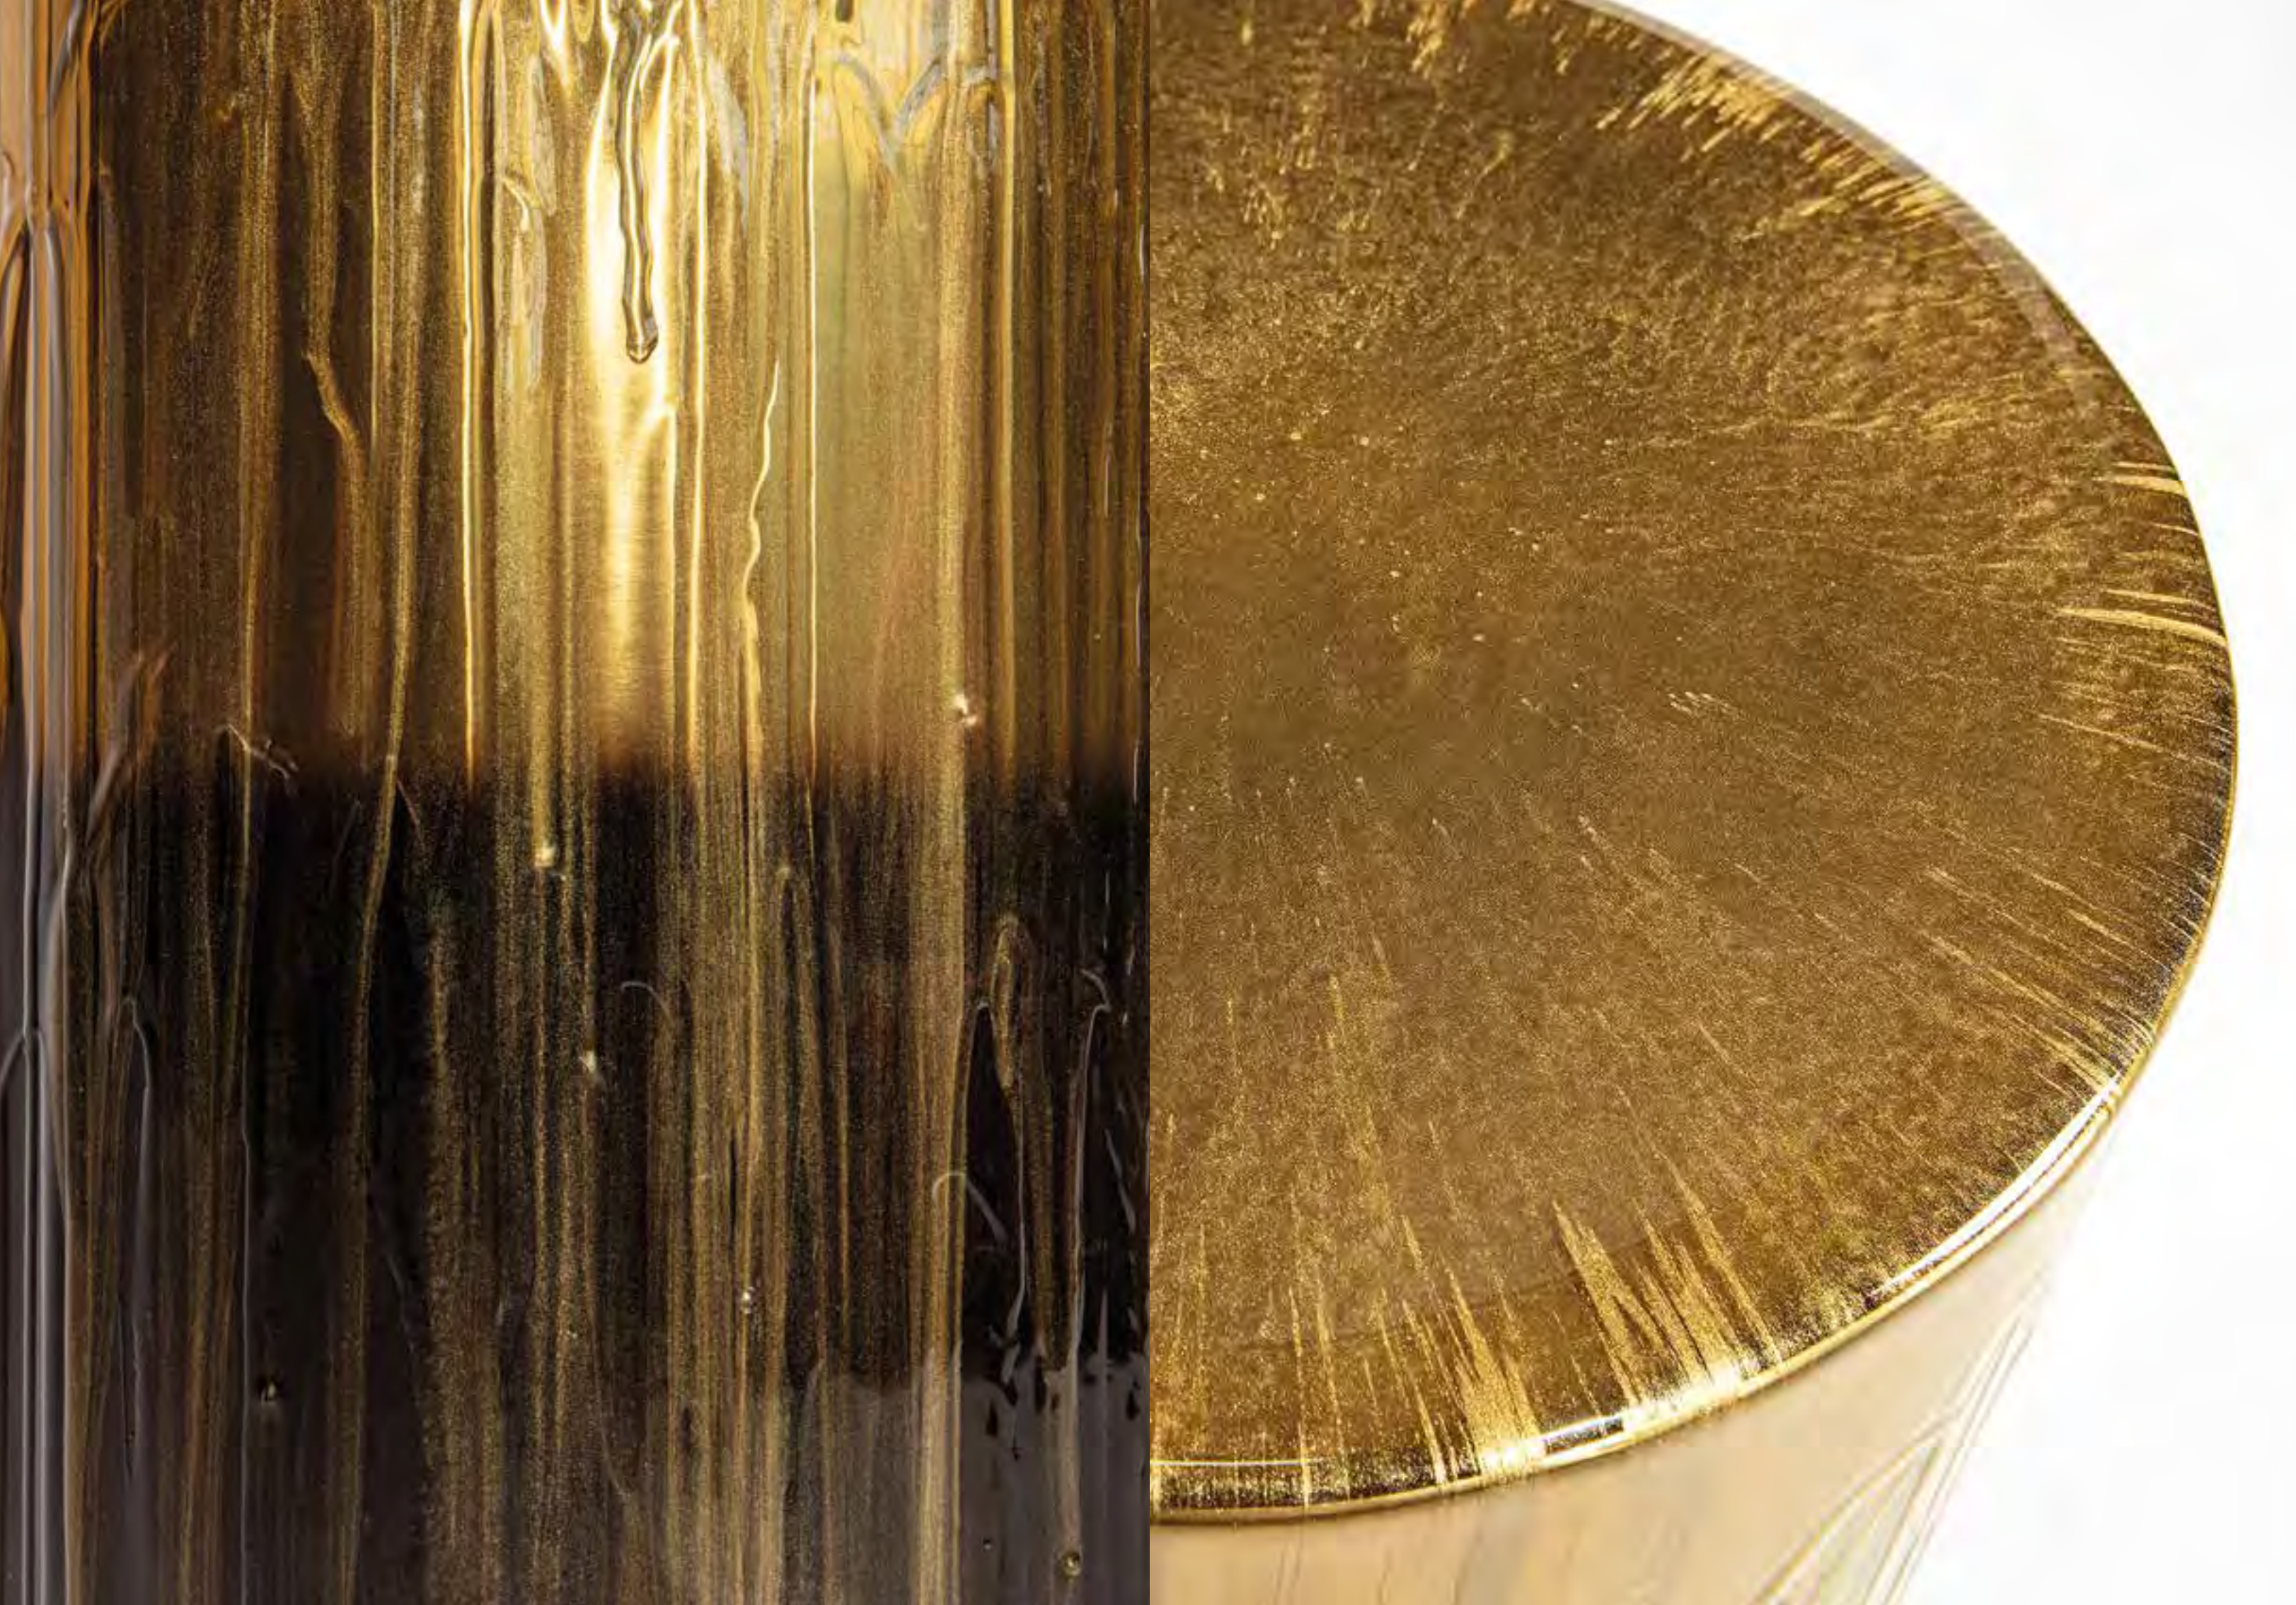

Furniture & Sculptures

Palmito
14" x 20"
metal + eposxy resin

Tronchetto Brothers
18" x 20"
metal + eposxy resin

Gallo
